Corso del Lavoro e della Scienza, 3, 38122, Trento

Opening times: every day 10.00 - 19.00

MUSE is the Science Museum of Trento. Designed and constructed by the Renzo Piano Building Workshop, the MUSE 'mountain' is a gem of Italian architecture. MUSE is a place of continuous transformation, a 'grid' of projects made up of exhibitions, events, workshops, conferences and research facilities. The permanent exhibition is flanked by innovative projects and numerous temporary displays that, over the course of the year, explore various topics in greater depth. The Science Museum performs basic and applied multidisciplinary research work in the natural sciences area. It does so with the aim of investigating, interpreting, educating, engaging and inspiring in the fields of nature, science, innovation and future sustainability. This pioneering formula makes MUSE one of Europe's most innovative science museums.

### **ROTARI WINERY**

Via Tonale, 110, 38010, San Michele all'Adige, TN

Set in the heart of the Dolomites, in the renowned Piana Rotaliana, the Rotari Winery is a far-reaching example of landscape architecture blending perfectly with its natural environment. The undulating roof design is reminiscent of the undulating terraces where their vines grow up Trentino pergolas.

The winery gathers and sees the vinification of wine grapes produced by over 1,600 wine grower members.
