Transcranial Brain Stimulation in Cognitive Neuroscience Workshop

Rovereto (Italy), December 6 - 7, 2018
Center for Mind/Brain Sciences - CiMeC, University of Trento

We envision the workshop as an opportunity to pursue focused and critical discussions of current empirical and theoretical issues concerning TBS in cognitive neuroscience and of the interfacing of TBS innovation and use in basic research vs. neurorehabilitation. Part of the workshop will be set aside for an open discussion and decision section on a current multi-centre transcranial alternating current stimulation initiative.

Invited Speakers

Marinella Cappelletti - Goldsmiths University of London, United Kingdom
Flavio Frohlich - University of North Carolina at Chapel Hill, USA
Nir Grossman - Imperial College London, United Kingdom
Simon Hanslmayr - University of Birmingham, United Kingdom
Friedhelm Hummel - Swiss Federal Institute of Technology, Geneva, Switzerland
Heidi Johansen-Berg - Wellcome Centre for Integrative Neuroimaging Oxford, United Kingdom
Jacinta O'Shea - University of Oxford, United Kingdom
Axel Thielscher - Copenhagen University, Hvidovre, Denmark

Scientific Organizers

Carlo Miniussi - University of Trento, Italy
Gregor Thut - University of Glasgow, United Kingdom
Lorella Battelli - IIT Italy; Harvard University, USA
Alexander Sack - Maastricht University, The Netherlands
